

DAVID CAIRNS

Credentials

Experienced in Supply Chain Solution Development & Review, specialising in the Assessment of Distribution Centre Operations and Design.

EXAMPLE PROJECTS

- Consulting Support role for major UK Retail / Wholesale organisation undergoing logistics change programme
 - Assessment of rationalisation programme following initial high level review suggesting reduction of warehouses was possible
 - Detail planning support for product transfer and consolidation programme in closure and re-alignment of supply chain for Ambient Food Products
 - General support to in-house project team on all aspects of projects for closure of warehouse, increase of capacity at other warehouses, changes in operating processes and general project control and measurement
 - Design and implementation planning support for construction and commissioning of additional temperature controlled warehouse capacity on existing client sites (build and reconfiguration).
- Review of transport and warehousing operations for manufacturer serving UK wholesale and retail customer base
 - Assessment of effect of nominated day scheduling (compared to pre-set lead time)
 - Assessment of amalgamation of flows from separate manufacturing sources using single or multiple stock bases
 - Review of use of outbases to serve distant customers (compared to practice of overnight delivery routes)
 - Assessment of potential for 3rd Party operation of transport
 - Review of handling methods and warehouse facilities for un-palletised product
- Logistics Network design for Eastern European Food Retailer
 - Assessment of logistics requirements for rapidly growing retail organisation
 - Formulation of programme for introduction of RDCs (multi-temperature) and NDCs (slow-moving goods, imports and Non-foods)
 - Outline selection of products for warehouse types, Warehouse design and fit-out specifications
 - Assessment of short term requirements for temperature controlled goods / produce
- Review of inbound and finished goods logistics for food manufacturer
 - Audit facilities of manufacturer (co-located with 2 production sites), off-site factory warehouse and ad-hoc facilities
 - Recommended consolidation of facility, preferably re-located closer to factory and operation of stricter movement of surplus goods away from on-site warehouse
 - Identified changes in transportation links between key sites and for finished goods to final market.
