

## APPRISE SERVICES

### 7. Education and training

We provide training in supply chain management and logistics at all levels, from general introduction to specialist one-to-one coaching for managers, in the UK and globally.

Apprise Consulting works with Professional bodies such as the CILT and the Institute of Operations Management, Universities and centres of learning to produce, manage and run supply chain and logistics related courses.

We have worked with the CILT to produce a 2 day, Warehouse Manager's course for Supervisors and level one managers, which is based on the CILT Level 5 qualification. Follow the links on the Services page under Education and training to see some course outline examples. Courses can be run in conjunction with the CILT or as an in-house course. One to one courses are also available as witnessed by the work carried out on behalf of 512 Sheffield.

Real life, in-house examples can be used as exercises thus providing not only training but also potential answers to existing problems.

Apprise has also run this course in Russia utilizing a trainer/translator and also in Malaysia.

Apprise has worked with the University of Warwick to produce both Supply Chain and Operations related courses for students and for in-house courses. It recently won an award from BAe systems for the course content and professionalism of the course.

Available courses include:

Supply chain management

Supply chain risk management

Logistics outsourcing and ITT preparation

Operations management

Transport Management

Sourcing and Procurement

Warehouse Management

Inventory Management

Scheduling and Forecasting

Quality management

Internal Customer Relationship Management

Please contact us for further details or specific course outlines.
